

Team ID: NM2025TMID04699

Project Name: Calculating family expenses using ServiceNow

Maximum Marks: 4 Marks

Date: NOV - DEC 2025

Ideation Phase

Brainstorm & Idea Prioritization Template

Step 1: Team Gathering, Collaboration, and Problem Statement Selection

- All 4 team members gathered virtually to initiate ideation on possible real-world problems that can be solved using low-code platforms.
- After evaluating common administrative inefficiencies in schools, the team chose the problem statement:
- “How might we automate student admissions and academic performance tracking in educational institutions using ServiceNow?”

Step 2: Brainstorming, Idea Listing, and Grouping Raw Ideas Collected:

1. Auto-generation of admin number
2. Digital admission form
3. Auto-fill form data from existing tables
4. Pin code-based area detection
5. Auto-calculation of student total & percentage
6. Visual status flow of admission
7. Parent contact tracking
8. Conditional form field disabling
9. Role-based access control
10. Cloud-access from anywhere
11. Automate result declaration
12. Quick reporting system
13. Future integration with email/SMS notifications.
